

OPTI NEWS

Palevator® Spring Scissor Lifts from Optimum Handling Solutions.

Palevator® spring Optimum Handling Solutions are designed for the safe stacking of pallets containing heavy bulk products such as paper, tinned food and bottled beverages among others.

Palevator® spring scissor lifts do not require power or compressed air supply for operation. An additional advantage is its flexibility since the Palevator can be used anywhere and easily transported around the factory for use in different applications.

Palevator® spring scissor lifts are available in stainless steel, hot dipped galvanised or powder-coated finish.

The weight capacity of the scissor lifts can be quickly and easily adjusted by simply removing or inserting the correct springs based on the desired application.
