

1000kg Low Profile Scissor Lift Table

OVERVIEW

Optimum's 1000kg Low Profile scissor lifts are a versatile hydraulic lift table that's commonly used in the manufacturing and food processing industry to raise loads and eliminate bending and stretching when unloading or loading pallets. With the option of a turn table rotating top these units are a great investment for any operation looking to speed up productivity and reduce operator safety issues. Used with an optional ramp with a heavy duty ramp makes it the perfect pallet elevating platform for pallet truck use or where pallets over 1.2m are being palletised.

FEATURES

Suitable for loads up to 1000kg

- ✓ Industrial quality Italian 'BUCHER' 3 phase hydraulic power pack and oil less bushes on pivot points
- ✓ External power pack equipped with a relief valve against overloading and compensation flow valve for controlling lowering speed
- ✓ Achieves a low profile, eliminating the need for a pit installation
- ✓ Removeable lifting eyes to facilitate handling and installation of the table
