

2000kg Low Profile Scissor Lift Table

OVERVIEW

Optimum's 2000kg Low Profile scissor lift is a heavy duty durable hydraulic lift table designed for areas where a low profile is needed, without the costly need for a pit installation. Frequently used for unloading and loading of products into stillage's and pallets but also commonly used where levels on factory floors are stepped, limiting access around the site for electric and manual pallet trucks. This versatile and compact piece of equipment has many uses in many industries. These units are a great investment for any operation looking to speed up productivity and reduce operator safety issues.

FEATURES

Suitable for loads up to 2000kg

- ✓ Industrial quality Italian 'BUCHER' 3 phase hydraulic power pack and oil less bushes on pivot points
- ✓ External power pack equipped with a relief valve against overloading and compensation flow valve for controlling lowering speed
- ✓ Achieves a low profile, eliminating the need for a pit installation
- ✓ Removeable lifting eyes to facilitate handling and installation of the table
