

PAL-TEC PALLET DISPENSERS

PALLET DISPENSER

Optimum's Pallet Dispensers are designed for storing and dispensing pallets into work areas where forklift access is limited and continuous pallet supply is required. Pallet Dispensers are an excellent way to separate pedestrians from forklift traffic areas - a big tick for safety.

- ✓ Four swing in hook tynes raise & lower the pallet stack
- ✓ Fully automatic pallet dispensing
- ✓ Front & rear pallet access
- ✓ Air operated with 240v controls
- ✓ Safety beams front and rear
- ✓ Australian Made compact design

Model	Capacity	Power	Overall Height	Base Size	Cycle Time
PD15	15 pallets	Pneumatic	2480 mm	2430 x 1480 mm	30 sec
PD20	20 pallets	Pneumatic	3230 mm	2430 x 1480 mm	30 sec

BENEFITS

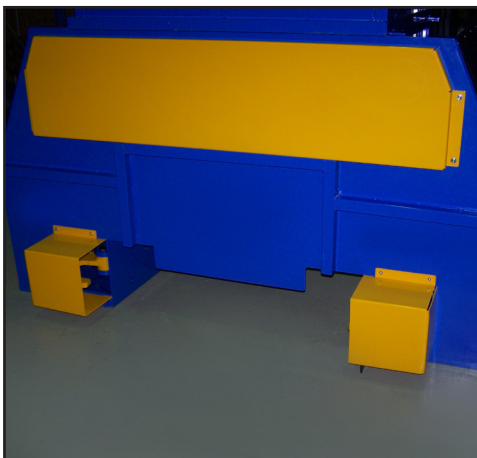

- ✓ Create forklift free zones
- ✓ Efficient pallet storage
- ✓ Pallet truck access

AUTO EYE CONCEPT

Optimum Pallet Dispensers 'auto eye' feature has the ability to detect when a pallet is removed and another pallet is required, auto eye will then automatically lower another pallet ready for retrieval. This feature allows the operator to remain on the forklift or pallet truck platform throughout loading, eliminating the need to manually operate the machine to dispense a pallet.

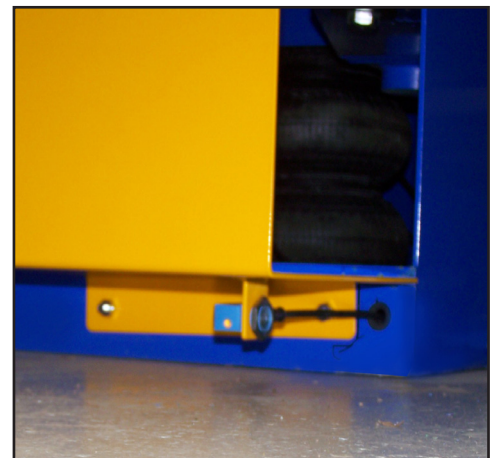

**DESIGNED &
BUILT IN AUSTRALIA**

> Rear pallet access

> Pallet ready for pallet truck

> Safety beams front and rear
