

## PAL-TEC ROTATING PALLET GATE

### ULTIMATE ROTATING PALLET GATE

The best designs are always the simplest, and there is no better example of this than the Optimum's Rotating Pallet Gate. Lack of headroom is no longer an issue with virtually no height restrictions other than your ceiling. The steel chequer base stands just 65mm from the floor. Further features include three way off loading and full through access for Cranes and Hoists. Many customers have limited floor space and the three way off loading speaks for itself. All of this comes with kick plates and powder coating as standard and, of course, full edge protection at all times.

#### Constant problems encountered by our customers:

- ✓ Lack of headroom
- ✓ Need to operate overhead crane/hoist
- ✓ Restricted access in Loading area

**We have the solution.**

### FEATURES

- ✓ Three way offloading
- ✓ Stands just 1150mm high
- ✓ Through access for crane/hoist
- ✓ Takes standard and non standard Pallet sizes
- ✓ And MOST importantly - Full edge protection
